The Big Food Map: A citizen science project in Flanders mapping the subjective food environment using a co-created mobile application

Suzannah D'Hooghe & Jessie Van Kerckhove – Sciensano; Belgium

DE GROTE VOEDSEL KAART

Samen de voedselbuurt verkennen

Partners

BACKGROUND

- Food environment in Flanders has drastically changed over the last 2 decades
- Dominance of *food swamps*
- Objective data = known (multiple studies in the past)

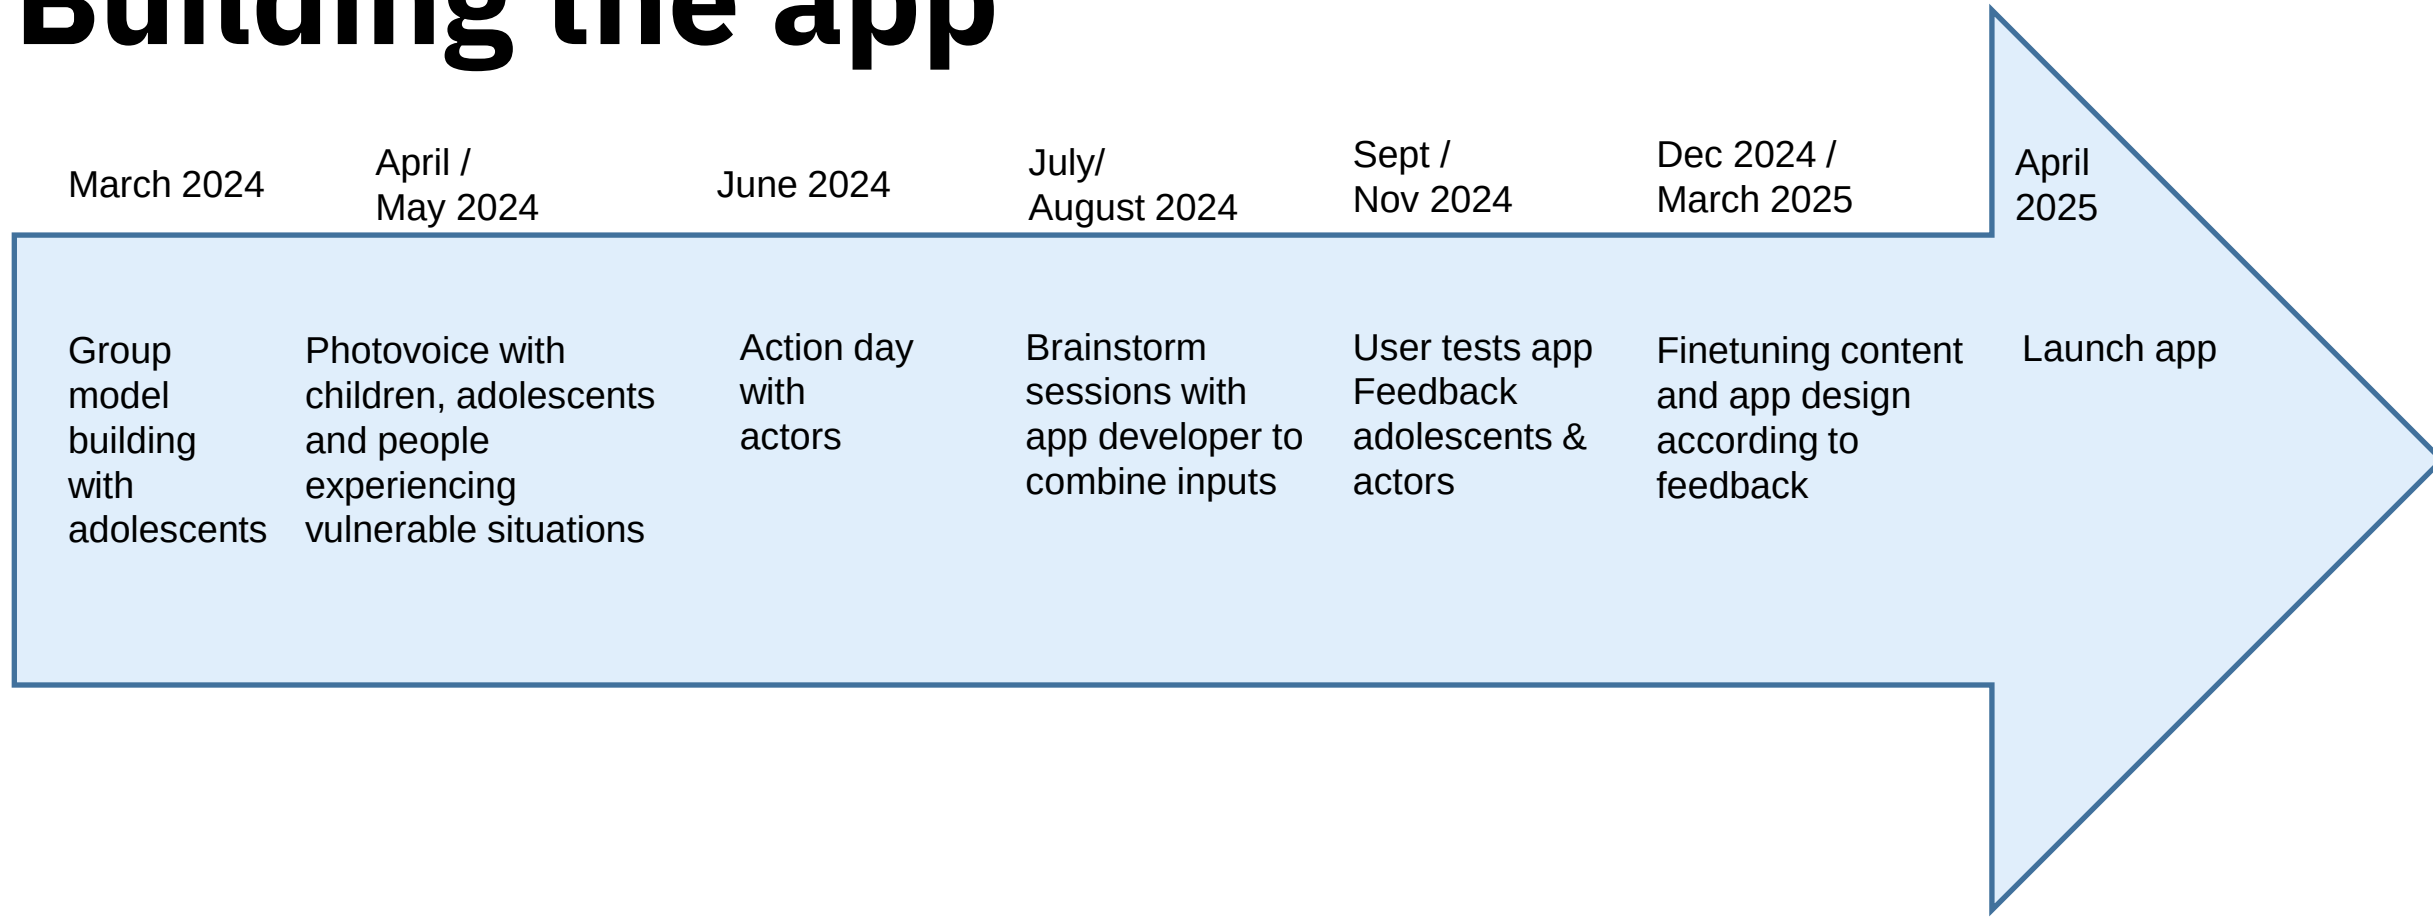

AIM

- Gather *subjective insights* and *perceptions* about the food environment in Flanders
- Using an app that was *co-created* with those same citizens
- Increase *awareness* among citizens and stakeholders about the “food environment”
- Create public support for *actions* that contribute to a healthy food environment
- Stimulate *policy* for healthier food environments

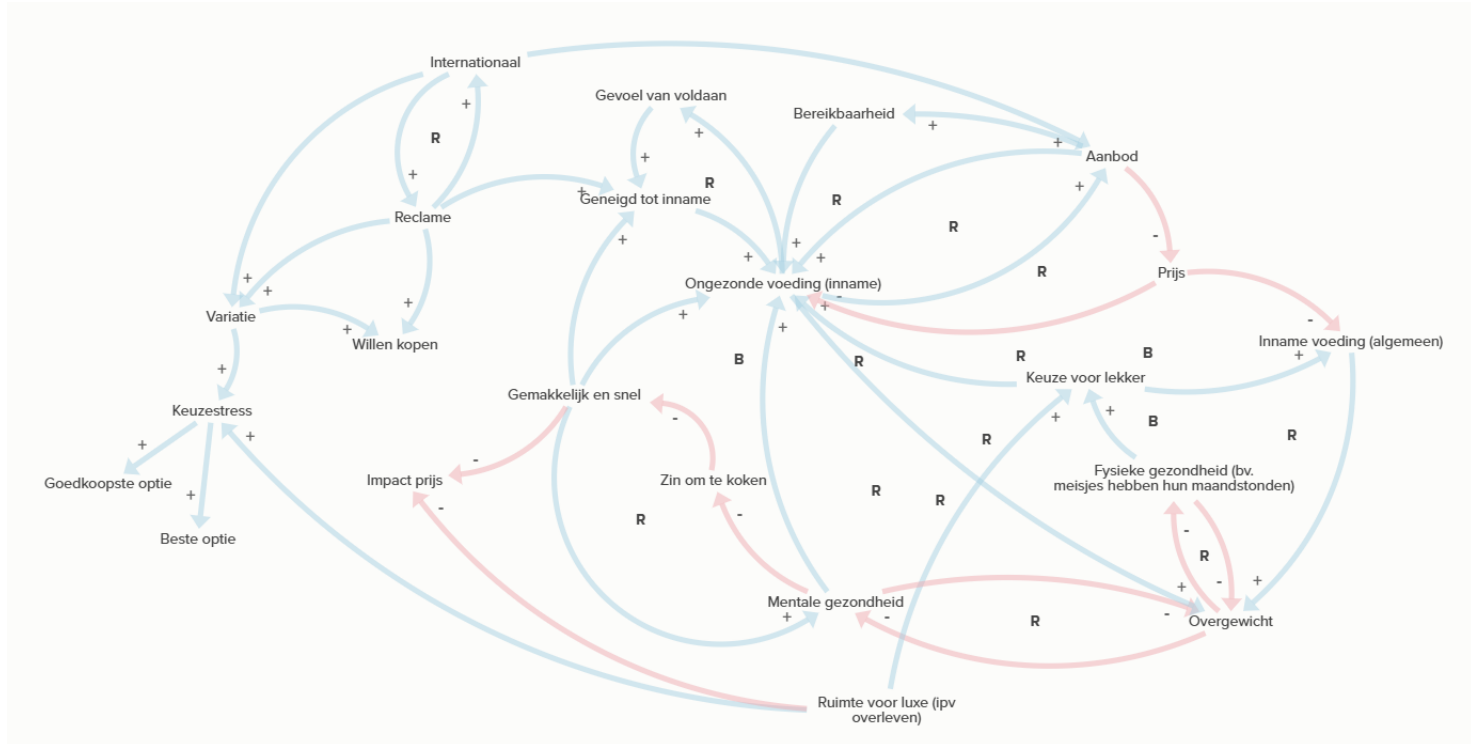

Building the app

Some insights in the development process

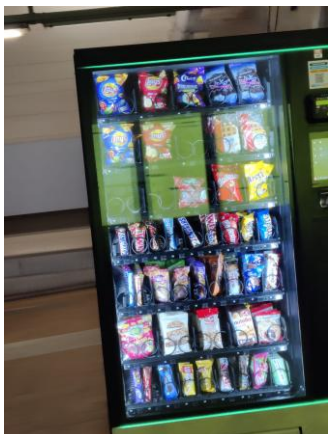

GROUP MODEL BUILDING

- Method within systems dynamics
- Participatory
- Creating a shared understanding of a complex problem

3 sessions GMB with adolescents

- **Aim:** explore how to frame the central topic
- 3 different questions
- Creation of the definition of 'food environment'

Some insights in the development process

Based on the developed definition
PHOTOVOICE: 2 sessions across 3
groups
(adults experiencing vulnerable
situations, adolescents (16-17 years old)
and children (10-11 years old))

- Introduction to the concept of the food environment
- Reflections: positive & negative influences
- Contextualization: settings & environments
- Coding: identify barriers & facilitators
- Actions (through role play)

Evaluate locations

Evaluate locations

INCLUDED SETTINGS

Supermarkets

Social food services (social groceries, social restaurants, food banks, ...)

Short chain initiatives

Vegetables stores

Animal product stores

Bakeries

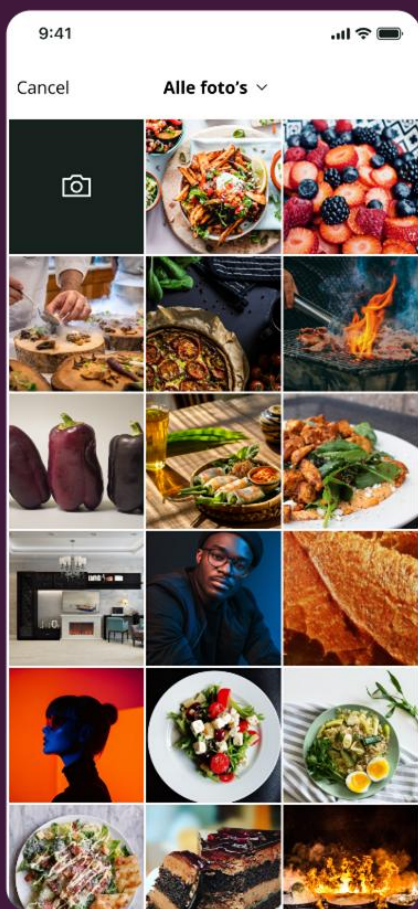

Fast food, take away & delivery

Full service restaurants

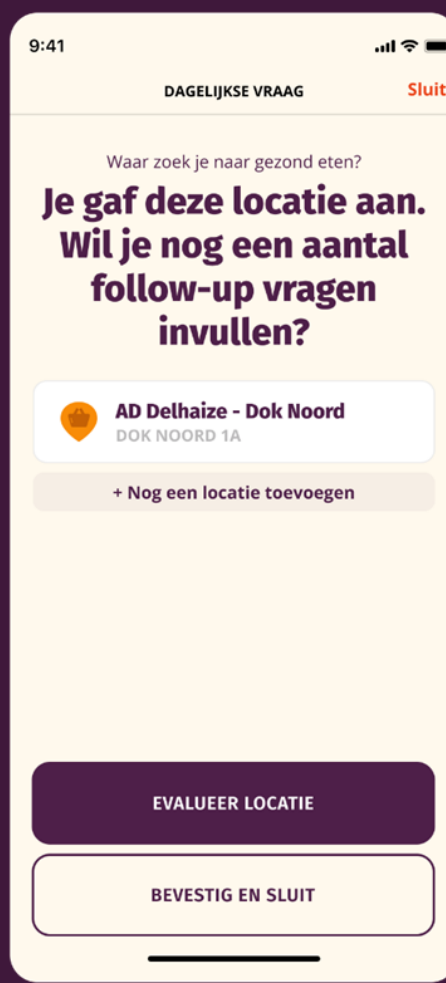

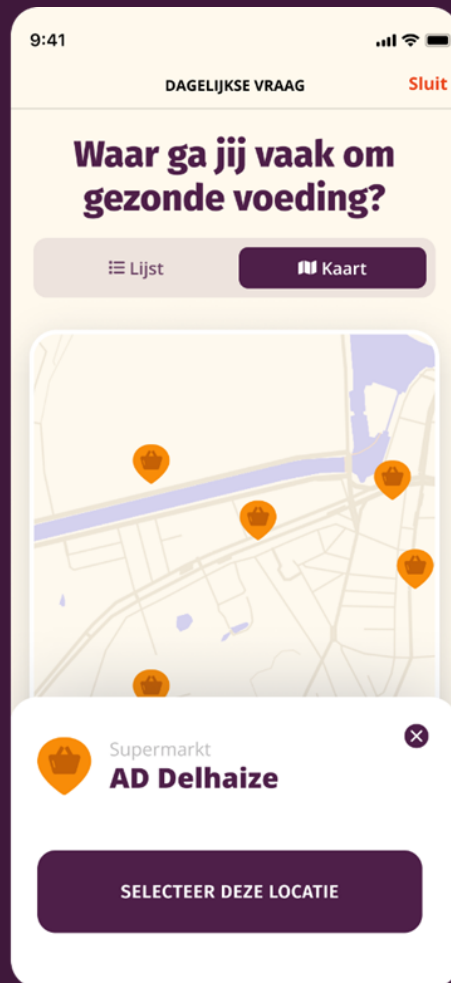

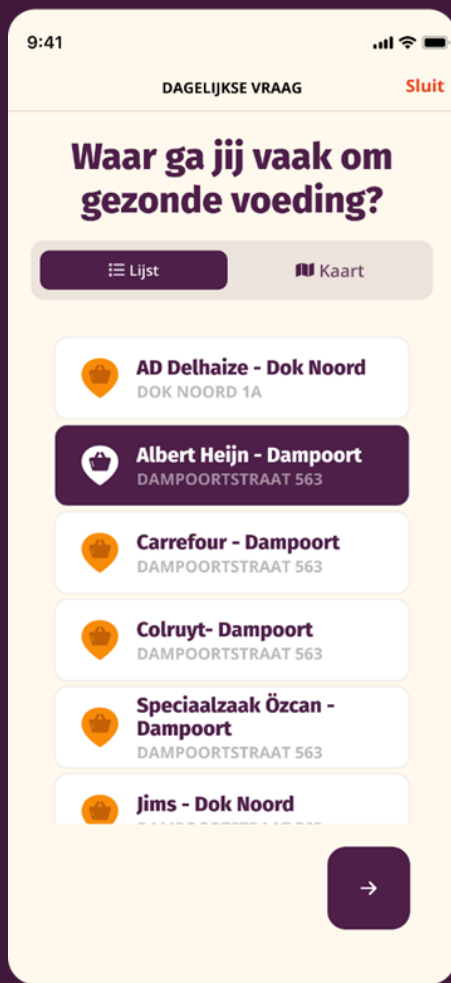

Sports and recreational settings

Educational settings (primary and secondary schools, universities, ...)

Weekly challenges

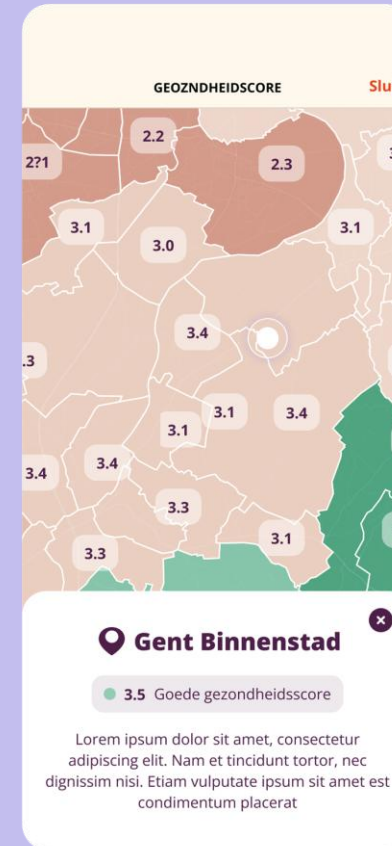

Daily questions

Valuable insights

In addition, we want to provide participants with insights about the research, including:

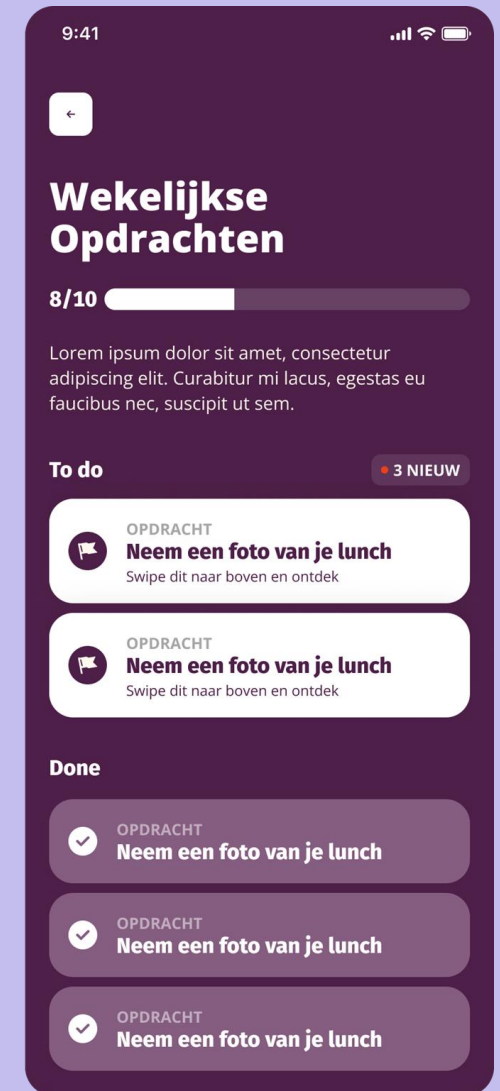

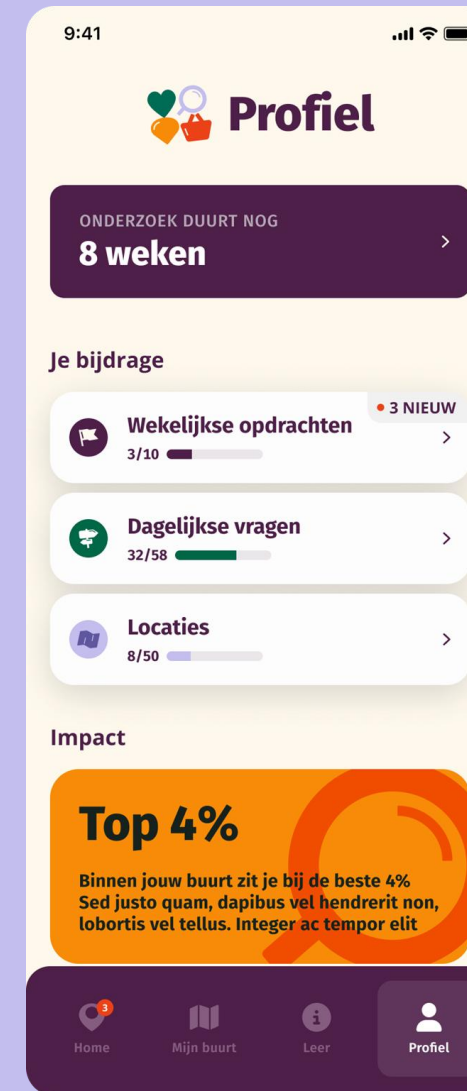

- **Statistics** related to the research
- **An interactive map** to discover the health score in your neighborhood
- **Insights** after evaluating a specific location

Stay engaged!

De app includes a personal profile area. Here you can:

- Track your **progress** and actions.
 - View an overview of completed challenges.
 - Number of evaluated locations.
 - Review completed daily questions.
- Discover your impact and contributions to the research.

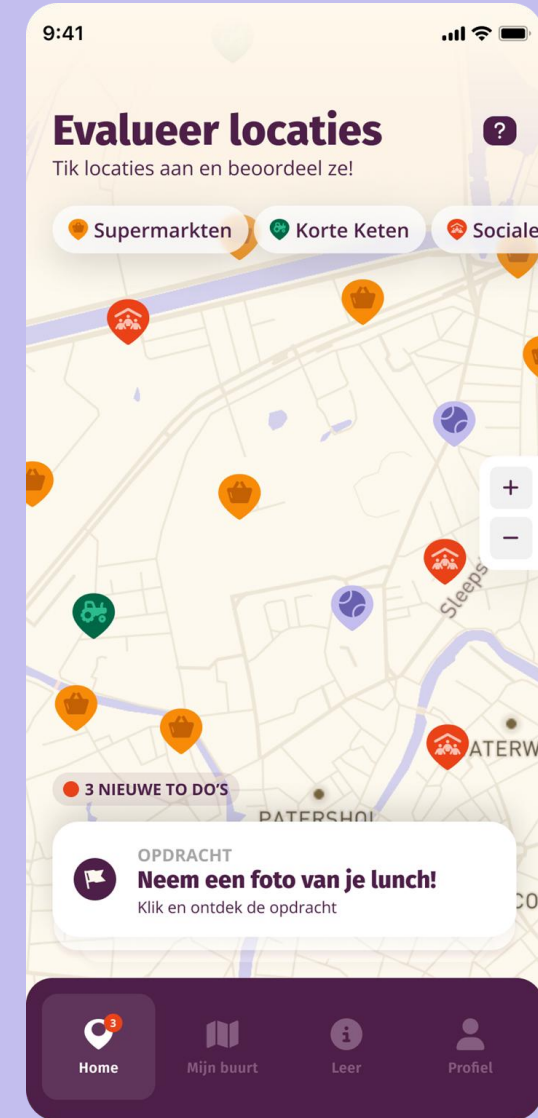

Communication / Recruitment

- 1 Media partner: Het Nieuwsblad
- Hoplr (local communication platform)
- Press release
- Social Media (Facebook, LinkedIn, Instagram, ...) – organizational and individual accounts & influencers
- Newsletters of diverse organizations (social organizations, universities, schools, local governments, ...)
- Meta advertisement campaign
- Videos with National Ministers
- Guests in podcasts

What's next?

- App is live now until the end of June 2025
- Workshops to co-interpret and analyze results
- Co-create actions and recommendations
- Communication of results
