

Research Infrastructures (RI)

Facilities that provide **resources** and **services** to the research community to conduct **research** and foster **innovation** in the European landscape.

METROFOOD-RI

The distributed Research Infrastructure to provide high-quality **Metrology** services, knowledge and tools in **Food** and **Nutrition**.

METROFOOD.BE

The **Belgian node** of METROFOOD-RI, led by **Sciensano** to strengthen and integrate services related to food safety and metrology, ensuring a robust, state-of-the-art infrastructure that can address wide-ranging European and global needs in food analysis and safety. The methodological focus is on **strengthening existing service capabilities**, **improving user engagement** through strategic testing and the development of use-cases, and **enhancing methodologies** to tackle essential food safety challenges.

Services

Analytical services

Analysis on toxins, pesticides, contaminants, trace elements, food additives, food contact materials and more.

Nanoparticles

Characterize the physicochemical properties of nanoparticles within the food domain.

Reference Materials

Providing proficiency testing schemes and developing reference materials.

Food Contact Materials (FCM)

Platform to support the safe and sustainable development of food contact materials.

For who?

Research
Academics

Food Business
Operators

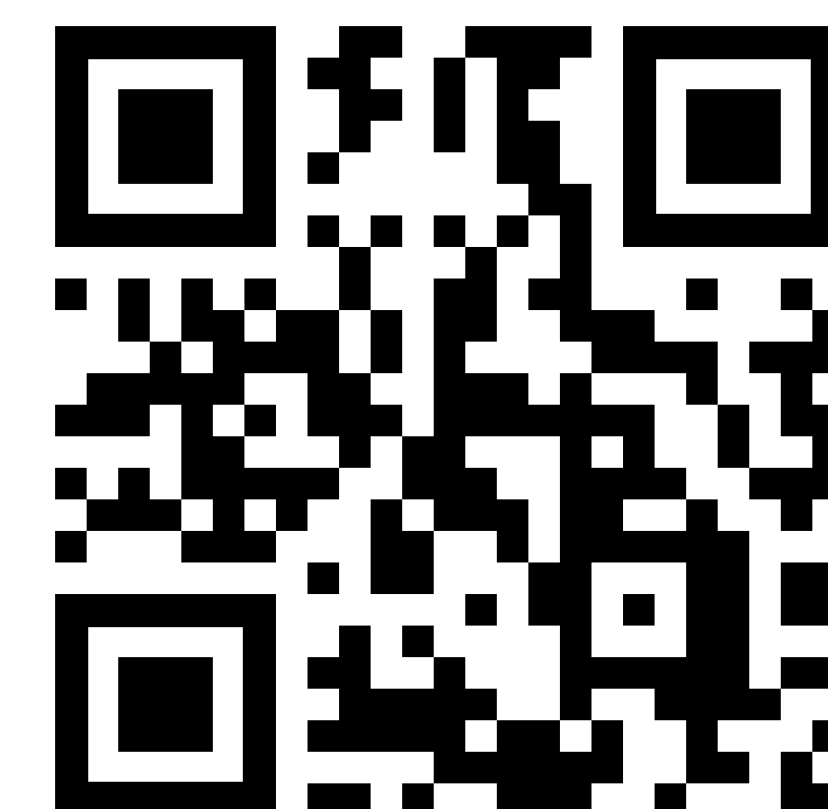

Policy Makers
Food Inspection
& Control

Consumers
Citizens

Results

METROFOOD-BE is actively **testing and refining** established **services and protocols** to improve stakeholder engagement and ensuring alignment with evolving food safety and quality standards. **Organized stakeholder meetings** have further increased visibility and strengthened the Belgian node within METROFOOD-RI, reinforcing collaboration and enhancing service accessibility. Additionally, efforts are being made to expand the Belgian node by attracting **new Belgian research partners**.

Future perspectives

- ➔ Boost stakeholder engagement
- ➔ Strengthen and expand the Belgian node
- ➔ Reinforce collaboration and accessibility

ACKNOWLEDGEMENTS

This research was funded by the European Commission and the Belgian Science Policy Office (BELSPO)
